

What is Claimed is:

1. A sales activity management system for selling an information processing apparatus from an apparatus manufacturer to a user, and selling available information contents at the information processing apparatus from an information provider to the user, said activity management system characterized by comprising:

an apparatus manufacture management terminal device for managing manufacture of said information processing apparatus, and managing a sales price of said apparatus manufacturer;

an information provision management terminal device managed as to provide a user with, available information contents at said information processing apparatus, and to collect a charge; and

a sales activity management apparatus for setting an amount of money to be remitted to said manufacture according to charge information inputted from said information provision terminal device.

2. A sales activity management system as claimed in claim 1, characterized in that said sales activity management apparatus sets the sales price of said information processing apparatus according to an amount of money for the charge collected from said user.

claim 1, characterized in that said information provider is a broadcasting service provider for providing charged information contents to said user, and collecting a reception charge from the user.

8. A sales activity management system as claimed in claim 1, characterized in that said information provider is a communication service provider that collects a base charge and an actual telephone call charge from the user.

9. A sales activity management system as claimed in claim 1, characterized in that said information provider is an information medium sales provider that provides an information medium having information contents recorded therein to said user, and collects a payment of a product from the user.

10. A sales activity management system as claimed in claim 1, characterized in that said apparatus manufacture management terminal device, information provision management terminal device and sales activity management apparatus are connected to each other by communication means, integrally managing delivery information concerning the number of deliveries for said essential parts, sales information concerning the sales quantity of said information

processing apparatus and use information concerning a use quantity of said information contents.

11. A sales activity management system as claimed in claim 10, characterized in that Internet, telephone lines, satellite lines or dedicated communication line is used for said communication means.

12. A sales activity management apparatus for managing businesses for selling an information processing apparatus from an apparatus manufacturer to a user, and selling available information contents at the information processing apparatus from an information provider to the user, said apparatus characterized by comprising:

input means for inputting sales information concerning sales quantity of said information processing apparatus and use information on said information contents; and

storage means for storing the sales information on information processing apparatus and use information on said information contents that have been inputted by said input means; and

management control means for setting an amount of money remitted to said apparatus manufacturer according to said sales information and said use information that have been stored in said storage means.

13. A sales activity management apparatus as claimed in claim 12, characterized in that said management control means sets the sales price of said information processing apparatus according to an amount of money for the charge collected from said user.

14. A sales activity management apparatus as claimed in claim 12, characterized in that essential parts to be incorporated in said information processing apparatus are supplied from a part manufacturer.

15. A sales activity management apparatus as claimed in claim 14, characterized in that said management control means sets the sales price of said essential parts according to an amount of money for the charge collected from said user.

16. A sales activity management method for selling an information processing apparatus from an apparatus manufacturer to a user, and selling available information contents at the information processing apparatus from the information provider to the user, characterized by comprising:
making a license agreement in advance with respect to sales of said information processing apparatus and

information contents between said apparatus manufacturer and information provider;

managing manufacture of said information processing apparatus, and selling said information processing apparatus to a user at the sales price of said apparatus manufacturer;

providing available information contents at said information processing apparatus, and then, collecting a charge; and

setting an amount of money to be remitted to said apparatus manufacturer according to an amount of money for the charge collected from said user.

17. A sales activity management method as claimed in claim 16, characterized in that a license agreement is made with respect to sales of essential parts, an information processing apparatus and information contents among the part manufacturer for manufacturing essential parts of said information processing apparatus, said apparatus manufacturer and information provider.

18. A sales activity management method as claimed in claim 16, characterized in that essential parts to be incorporated in said information processing apparatus are supplied from a part manufacturer to said apparatus manufacturer.

19. A sales activity management method as claimed in claim 18, wherein said management control means sets the sales price of said essential parts according to an amount of money collected from said user.

20. A sales activity management method as claimed in claim 16, characterized in that said information provider is a broadcast service provider that provides charged information contents to said user, and collects a reception charge from the user.

21. A sales activity management method as claimed in claim 16, characterized in that said information provider is a communication service provider that collects a base charge and an actual telephone call charge from the user.

22. A sales activity management method as claimed in claim 16, characterized in that said information provider is an information medium sales provider that manufactures and sells an information medium having information contents recorded therein to said user, and collects a payment of a product from the user.

23. A sales activity management method for managing

businesses for selling an information processing apparatus from an apparatus manufacturer to a user, and selling available information contents at the information processing apparatus from an information provider to the user, said method characterized by comprising:

inputting sales information concerning sales quantity of said information processing apparatus and use information on said information contents; and

storing the sales information on information processing apparatus and use information on said information contents that have been inputted by said input means; and

setting an amount of money remitted to said apparatus manufacturer according to said sales information and said use information that have been stored in said storage means.

24. A sales activity management method as claimed in claim 23, characterized in that said management control means sets the sales price of said information processing apparatus according to an amount of money for the charge collected from said user.

25. A sales activity management method as claimed in claim 23, characterized in that essential parts to be incorporated in said information processing apparatus are supplied from a part manufacturer.
